

Portsmouth Ox

**ALBANO
OUTDOOR**
where cooking meets art.

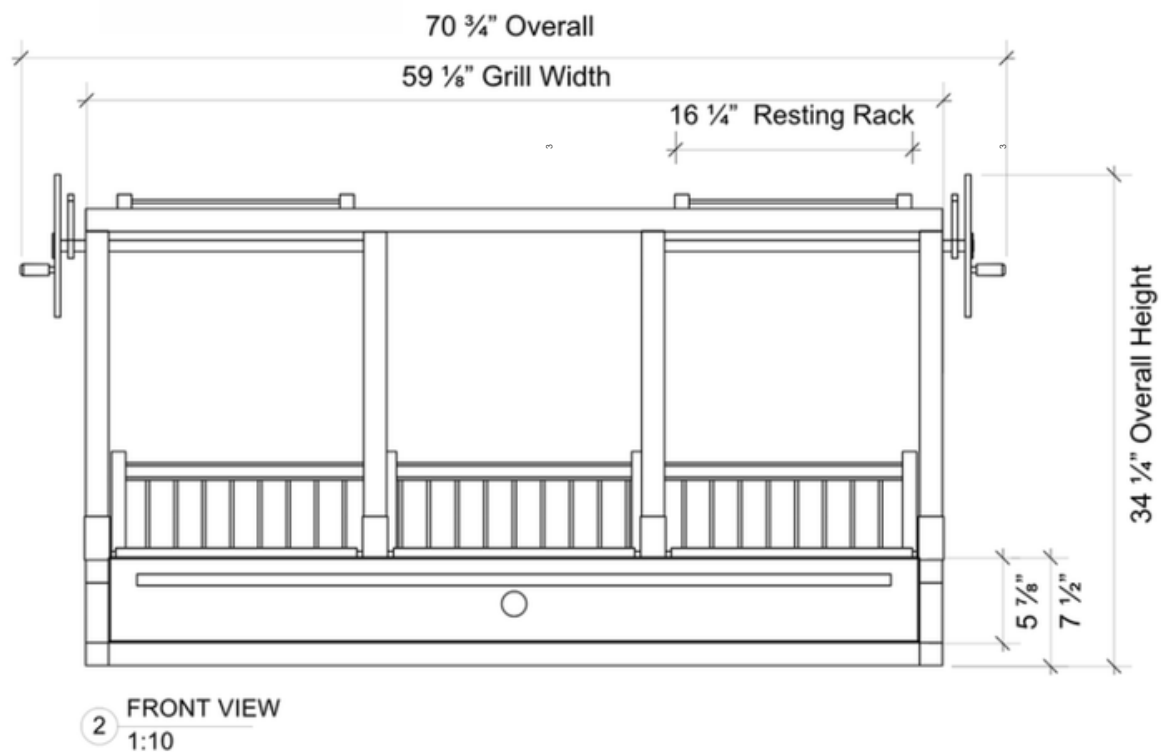

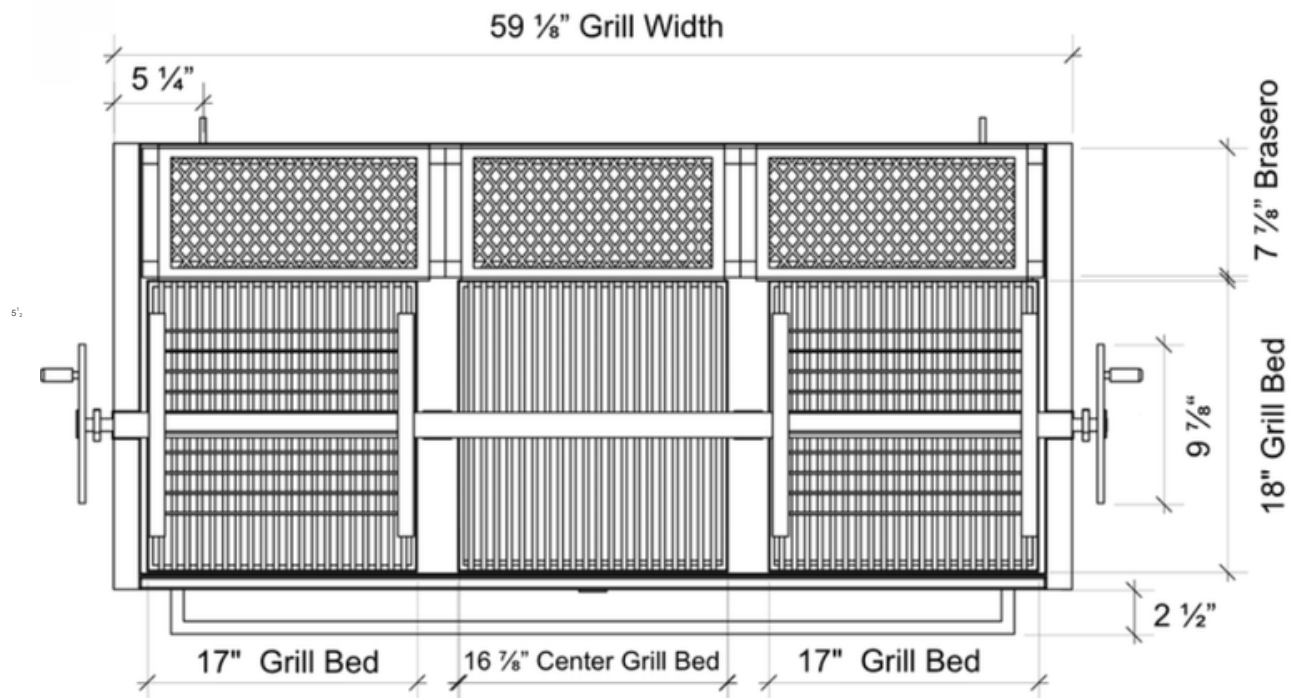

Our flagship model, the Portsmouth Ox, is the ultimate outdoor grill designed for serious outdoor home chefs who need maximum cooking space, high heat capacity, and the ability to handle large-scale grilling with ease. The Portsmouth Ox offers enhanced cooking control and diversity with a larger fuel box with room for more coal - providing the option for both higher temperatures and longer cooking periods. The Portsmouth Ox also features a rear braseros (fire basket), which can be used to create your own embers and better manage heat distribution. It also adds a touch of theatre to your grilling experience.

The Portsmouth Ox features our easy-to-use wheel mechanism providing complete temperature control, two interchangeable larger grill beds providing enhanced cooking space for grilling at two adjustable temperatures, a marine-grade (316) stainless steel construction, and customizable accessories to suit your individual cooking needs. It's perfect for outdoor temperature controlled grilling on wood or coal.

TECHNICAL INFORMATION

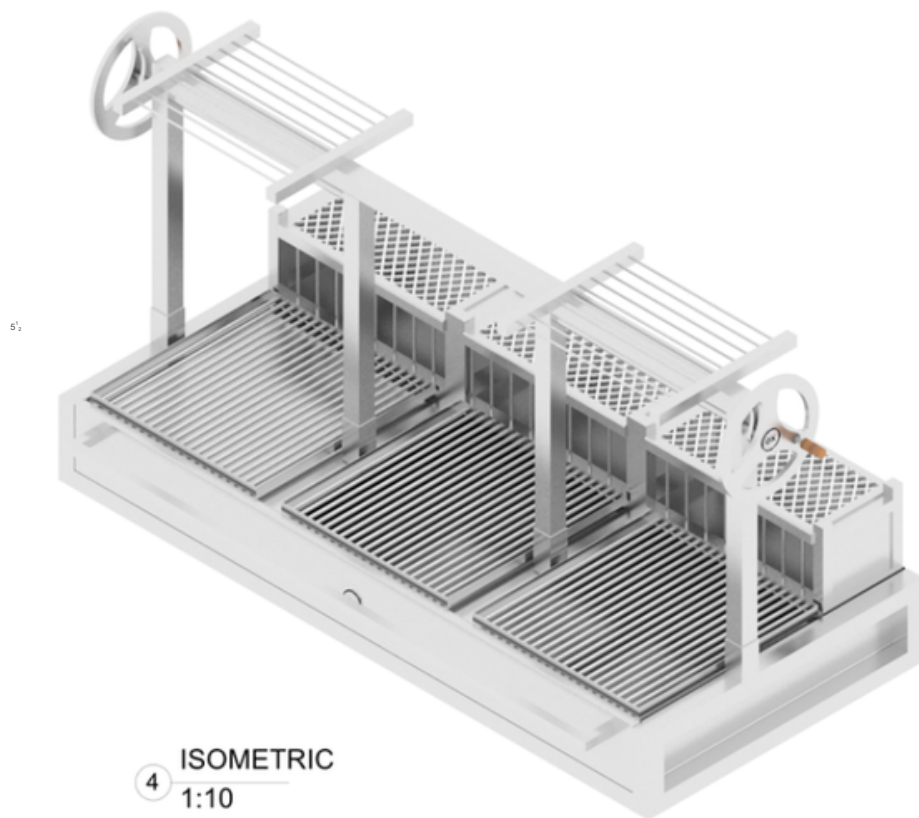

Grill Bed Options	Straight Bars (included as standard), Gridiron*, Plancha, V-grooves, Veg Grill*
Base Dimensions	59 1/2" x 27 1/2" (excluding depth of handle projection 2 3/4" and drainage pipe 1 1/4")
Width including wheel mechanism	68"
Height	34 1/2" to top of handwheel
Weight with fire bricks (estimated weight)	Grill head: 695 lbs Crated weight: 840 lbs Crate Dimensions: 75 1/4" x 36 1/4" x 41 1/4"
Stainless Steel Grade	316 marine grade
Firebrick base resistant to	2200°F
Adjustable grill bed height	Yes
Included as standard	Dual lift grill, central fire pit (with center straight bar grill bed grates), resting shelf, rear braseros with brasero grates, straight bar grill beds
Accessories available	Rotisserie, fish cage, poultry cage, ember rake, Iroko handle skewers, oven, additional grill bed options (above), wind guard, cover, stand and cupboard with castors (adjustable stainless steel feet also available).
Base/positioning requirement	Grills must be sited on a suitable heat-resistant base — a stainless steel frame stand/cupboard or brick/stone countertop. A metal countertop is not suitable owing to the heat which emanates from the base.
